About Me

Enthusiastic and self-driven Web Developer with a solid foundation in HTML, CSS, JavaScript, and basic backend technologies. Skilled in creating responsive web pages and understanding of modern development tools. Quick learner with a passion for coding and problem-solving, eager to start a professional career and contribute to real-world projects.

Education

NIMS University, Jaipur, Rajasthan

2022-2026

Computer Science Engineering: CGPA: 7.5/10

UR Collage, Samastipur, Bihar

2022

XII BSEB Board, Percentage: 65%

Holy Ganges Public School, Khagariya , Bihar

2020

X CBSE Board, Percentage: 74%

Skills

- * **Programming:** Python, C, C++, SQL.
- * **Speacialization:** Frontend ,Backend
- * **Web Development:** HTML5 ,CSS
- * **AI/ML:** Supervised Learning ,NLP,CNN
- * **Tools/Platform:** Git, GitHub, Jupyter, Google Colab, VS Code
- * **DataBase:** MYSQL

Notable Projects

E-Commerce Website:

- Developed a full-stack e-commerce platform with authentication and cart management..
- Tech Stack: React, Node.js, Express, MongoDB
- Features: Product listing, Search filter, Add to cart, Login/signup, Payment integration

Online Learning Platform:

- Developed a responsive Online Learning Platform that allows students to browse courses, enroll in classes, watch video lectures, and track learning progress.
- Key Features: - User registration and login authentication, Browse and search available courses, Course enrollment system, Video lecture streaming.
- Tech Stack: Frontend: HTML, CSS, JavaScript / React Backend: Java Spring Boot or Node.js Database: MySQL / MongoDB

Work Experience

- Machine Learning Intern (UNIFIED MENTOR) (Feb 2026- Aug 2026)
- Developed a Machine Learning model to predict student academic performance based on factors such as attendance, study hours, previous grades, and participation. The system analyzes historical student data to identify at-risk students and helps improve academic outcomes through early intervention.
- Built a predictive ML model to estimate house prices using historical real estate data such as location, area, number of rooms, and amenities.

Certifications

- SQL Analytics and Power BI
- AI WorkShop
- Chandrayaan-4 Live Project
- MATLAB and SIMULINK
